

TWDW-100 TARIFF

ITEM 730 - FREIGHT SHIPPED IN BAGS

Freight of any kind that is shipped in bags must be properly protected. At a minimum this protection must include cardboard on all sides due to the inherent vice of bags to easily tear if not protected. Additionally cardboard must be placed below the product and on top of the pallet in order to prevent the bags from dropping through the slats in the pallet.

If the product is not properly protected as described it will be accepted for shipping; however, 2 Day Transportation will not be liable for any claims due to rips or tears that arise from the inadequate protection.
