The fuel surcharge continues to increase by 0.5% for every comparable five-cent increase or decrease in fuel prices.

Application:

1. The fuel surcharge level will be adjusted on Wednesday of each week based on the U.S. National Average Fuel Index of the prior Monday. The National Average Fuel Index is published by the Energy Information Administration of the U.S. Department of Energy.
2. In applying the surcharge, first determine the freight charges that would otherwise be applicable without the effect of the surcharge, including the effect of the alternation process and any applicable discount or reduction. Once determined, the charge will then be subject to increase by the amount of the surcharge. The surcharge will be shown as a separate line entry on the freight bill.
