\$5.00	\$5.04	42.0%

The fuel surcharge continues to increase by 0.5% for every comparable five-cent increase or decrease in the U.S. National Average Fuel Index.

In the case of flat rate pallet pricing (see Item 300 – Pallet Rate Pricing) where the fuel surcharge is included in the rate, a reduced FSC applies. The reduced FSC will not be assessed until the U.S. National Average Fuel Index reaches \$2.85, at which point a 0.5% FSC applies. This reduced FSC increases by 0.5% for every \$0.05 increase in the Index and will at all times be 20% lower than 2 Day's standard FSC described above. If the Index falls below \$2.85, the reduced FSC is zero.

Application:

1. The FSC level is adjusted on Wednesday of each week based on the U.S. National Average Fuel Index of the prior Tuesday. The U.S. National Average Fuel Index is published by the Energy Information Administration of the U.S. Department of Energy.
2. In applying the FSC, 2 Day will first determine the freight charges that would otherwise apply, including any applicable discount or reduction. The FSC will then be applied as an increase to those charges and will be shown as a separate line entry on the freight bill.
